

BLACK NERF BARS

Design Automotive Group asks how did Back Country earn its reputation for unbeatable durability? Years of developing and testing nerf bars on the roads of the New England and Great Lakes "Rust Belt," the company says. Back Country's black powdercoat tube

steps benefit from a three-stage epoxy-coat finishing process. All Back Country black powdercoat products have undergone this E-coat process since 1998. **Circle 305**

TRAILER GUARD

DuraSafe offers its Trailer Guardian, a unique safety device that helps prevent accidental trailer decoupling. Installs in seconds with a universal application that fits all ball and coupler combinations. Add security by placing a lock in one of the spring pin holes to secure the trailer to the tow vehicle. Trailer Guardian is

available in two single-arm models (for compact and mid-size cars, trucks and SUV's towing light to medium duty trailers) and two dual-arm models (for full-size trucks and SUV's towing medium to heavy duty trailers). **Circle 312**

V Power

The only performance muffler in the industry that utilizes "Flow Deflector" technology and is 100% REVERSIBLE.

Adjustable, Stackable, Simple Installation

MPD Monitor with Heads Up Display

- Adds 100+ horsepower In Cab Adjustability
- 200ft lbs of torque
- Easy Installation
- Increases Fuel Economy
- All diesel applications are loaded into one unit

One module fits all Diesel Brands

2004.5+ Ford Powerstroke • 2003+ Dodge Cummins
LLY & LB7 Duramax Diesel • Jeep Liberty CRD • DT466 International

Step into the future with TS Performance's MP-8 diesel performance module. This universal module is unique due to the fact that ALL diesel brand applications are loaded into one simple install unit. A unit that has the capabilities to retain up to 16 different programs! The MP-8 communicates directly with the engine's ECM, from which it receives vital engine and fuel system information. This enables the MP-8 to provide smooth and precise power in real time under any driving condition, drivability, towing, mileage and most importantly, POWER.

Optional Heads up Display allows user to select one feature at a time to be displayed on vehicle's windshield.

No more taking eyes off of the road to check your gauges. No more trying to find a spot so you can see your gauges or monitor. Switch heads up features on the go.

Features:

- EGT's, Boost, Fuel Pressure, RPM's
- Stores minimum and maximums of each feature.
- Able to reset on the fly or before race or pull.
- Adjustable brightness levels.
- Stand Alone Unit. Works with any brand diesel performance module or without upgrades.
- Shown with optional Heads up display
- One unit for all applications Ford, Dodge, Chevy, International, Jeep.
