

7

7) DRAW-TITE

With the ability to handle trailers with up to eight brakes and four axles, the Activator II all-electronic brake control allows drivers to adjust the amount of braking power in their vehicles as well as the rate of application according to their preferences, road conditions, the type of trailer and the load. The driver can control the amount and rate of braking from soft to aggressive. The device's digital output displays feedback, and shows when the trailer brakes are properly connected. It also shows troubleshooting messages to help identify potential problems. **\$108. Draw-Tite: 800/632-3290; draw-tite.com.**

8

8) DURASAFE

The Trailer Guardian helps stop the trailer coupler from accidentally popping off of a vehicle's tow ball while towing. The device installs quickly with a universal application that fits most ball and coupler combinations. The company says the Trailer Guardian will stay connected to the tow vehicle even if there is a faulty hookup, an improperly secured coupler latch, loss of nut from the tow ball, or equipment failure. A lock can be inserted in one of the spring pin holes to secure the trailer to the tow vehicle. **\$52. DuraSafe: 866/544-5615; durasafe locks.com.**

9) EDGE

GM Duramax owners can dramatically increase their engine's torque and horsepower with Edge Products' Juice with Attitude combination, designed for 2006-'07 LBZ and LLY models. The Juice plug-in module boosts power via six on-the-fly adjustable power levels, adding 30 to 100 hp and 60 to 200 ft.-lb. of torque, depending on the power level selected, according to the company. The Attitude in-cab controller replaces add-on boost and exhaust gas temperature (EGT) gauges, showing digital readouts. **\$949. Edge Products: 888/360-3343; edge products.com.**

10) FAN-TASTIC VENT

Standing 14 inches tall on retractable legs, less than 4 inches deep, and weighing less than 5 pounds, the portable Endless Breeze provides air movement of up to 900 cubic feet per minute via its 12-inch blade that can operate at three different speeds. The fan's maximum current draw is 3 amps, and comes with a 12-volt plug and cord. It's also easy to store in your vehicle, tent, camper or anywhere else. **MSRP: \$69.99 Fantastic Vent: 800/521-0298; fantasticvent.com.**
