World's First Codeable Locks

Locks that learn your vehicle key

New Product Showcase Award Nominee

1. Insert Your Key
2. Turn Once
3. The Lock Learns Your Key!

Introducing the world's first codeable lock products that learn your vehicle key. This series of innovative DuraSafe locks incorporate a patented cylinder that enables you to insert your vehicle key, turn once, and program the lock to your key. The cylinder is automotive grade allowing for thousands more key codes than a standard lock. Its 6-plate tumbler with sidebar makes it impossible to pick or bump.

Imagine the convenience of using your car/truck key instead of having to search for separate keys or trying to remember a lock's combination miles from home. Offered in a variety of DuraSafe products including; receiver lock, padlock, cable lock, swing tongue trailer lock, spare tire lock and motorcycle disc brake lock.

Fits over 88% of light trucks and over 70% of ALL Ford, GM and Chrysler vehicles on the road. Compatible with 111 million vehicles. Made in the U.S.A.
